

**Thanks to each of you for the
combined effort which led to a
productive workshop**

20 talks

posted on web

(DVD of workshop will be available on request)

**Thanks to Virginia Tech Office of Research
and Jefferson Laboratory
for their support**

Summary of World-wide ADS Activities

China, Ukraine, Russia, Belarus, Brazil

- Ongoing programs in accelerator-driven transmutation of waste and Th fuel utilization

There is no active U.S. Program in ADS technology

The Future of the Nuclear Fuel Cycle

Report Release and Reception

with

Professor Ernest J. Moniz

Director of the MIT Energy Initiative (MITEI)

Professor Mujid Kazimi

Director of the MIT Center for Advanced Nuclear Energy Systems

Dr. Charles Forsberg

Executive Director of the MIT Fuel Cycle Study

Thursday, September 16, 2010

from: <http://csis.org/event/future-nuclear-fuel-cycle>

NOTHING NEW OR PROMISING AT ALL !!

**Your fellow citizens need and deserve more from us
6,697,254,041 people need and deserve more from us**

- a long way from what President Obama and Secretary Chu are asking and hoping for
- not surprising that ARPA-E didn't see anything 'transformative' to pursue in nuclear energy
- High-Energy and Nuclear Physics and their accelerators provide a powerful new tool which opens new avenues
- at least as important as finding the Higgs or neutrino oscillation parameters
- Why NOT invest time and effort **directly** focused on a promising solution to a major problem facing us today?
- DOE-NE will simply have to be brought along down the road
- **This group is on to something important, and it's exciting to be a part of it**

... finally, a personal thanks to all
