

PHYS/ECPE 4984: NANOTECHNOLOGY

Course Pack

edited by:

S. Rayyan

W. Barnhart

J. R. Heflin nm

S. Evoy

Virginia Polytechnic Institute and State University

January 2001

TABLE OF CONTENTS

A. MICRO/NANOFABRICATION AND CHARACTERIZATION

1. Scanned Probe Microscopy

A1: Scanned Probe Microscopes

Reference: H. Wickramasinghe, Scientific American, Vol. 261, No. 4, 98-105 (1989)

A2: Atomic Force Microscopy

Reference: D. Rugar and P. Hansma, Physics Today, Vol. 43, No. 10, pp 23-30 (1990).

A3: Beating the Diffraction Barrier: Optical Microscopy on a Nanometer Scale

Reference: Betzig E., J.K. Trautman, T.D. Harris, J.S. Weiner, and R.S. Kostelak, Science Vol 251, 1468-1470 (1991).

A4: Near-Field Scanning Optical Microscopy Studies of Materials and Devices

Reference: J. Hsu, MRS Bulletin, August 1997, 27-30 (1997)

A5: Field-induced Nanometer to Atomic-Scale Manipulation of Silicon Surfaces with STM

Reference: I Lyo, P. Avouris, Science Vol. 253, 173-175 (1991).

2. Nanofabrication Techniques

A6: Lithography for Semiconductor Technology

Reference: C. Ngo, C. Rosilio, Nuclear Instruments and Methods in Physics Research B, Vol. 131 22-29 (1997).

A7: An Overview of Ion Beam Lithography for Nanofabrication

Reference: U. Tandon, Vacuum, Vol. 43, No. 3, 241-251 (1992).

A8: Nanofabrication Using Electron Beam and Its Application to Nanometer Devices Reference: S. Matsui, in Handbook of Nanostructured Materials and Technology, Vol. 3 (Electrical Properties), Ch. 11, 555-564, 582-583 (2000).

A9: Sub-10 nm Imprint Lithography and Applications

Reference: S. Chou, P.R. Krauss, W. Zhang, L. Guo, L. Zhuang, J. Vac. Sci. Tech. B, Vol. 15, 2897-2904 (1997).

3. Epitaxy

A10: Molecular Beam Epitaxy: from Research to Manufacturing

Reference: M. Henini, Thin Solid Films, Vol. 306 331-337 (1997).

A11: Epitaxial Film Deposition Techniques

Reference: J. George, in Preparation of Thin Films, Chap. 7, 303-315 , 324-335(1992).

4. Self-Assembly and Self-Organization

Self-Assembly

A12: Self-Assembly

Reference: R. H. Tredgold, in Order in thin organic films, Chap. 6, 116-134 (1994).

Block Copolymers

A13: Supramolecular Materials: Self-Organized Nanostructures

Reference: S. Stupp, V. LeBonheur, K. Walker, L. Li, K. Huggins, M. Keser, A. Amstutz, *Science*, Vol. 276, 384-389 (1997).

Ionic Self-Assembled Monolayers

A14: Fuzzy Nanoassemblies: Toward Layered Polymeric Multicomposites

Reference: G. Decher, *Science*, Vol. 277, 1232-1237 (1997).

5. DNA-Based Assembly

A15: A DNA-based Method for Rationally Assembling Nanoparticles into Macroscopic Materials

Reference: C. Mirkin, R. Letsinger, R. Mucic, J. Storhoff, *Nature* Vol. 382, 607-609 (1996).

A16: Organization of Nanocrystal Molecules Using DNA

Reference: A. Alivisatos, et al, *Nature* Vol. 382, 609-611 (1996).

A17: DNA-Templated Assembly and Electrode Attachment of a Conducting Silver Wire

Reference: E. Braun, Y. Eichen, U. Sivan, G. Ben-Yoseph, *Nature* Vol. 391, 775-778 (1998).

6. Self-Assembled Quantum Dots

A18: Semiconductor Quantum Dots: Progress in Processing

Reference: D. Duval, S. Risbud in "Handbook of Nanostructured Materials and Technology", Vol. 1 (Synthesis and Processing), Ch. 10 , 481-500 (2000).

7. Fullerenes and Nanotubes

Overview

A19: Carbon Nanotubes

Reference: P. Ajayan, in Handbook of Nanostructured Materials and Technology, Vol. 5 (Organics, Polymers, and Biological Materials), Ch. 6 , 375-406 (2000).

Nanotubes as AFM Probes

A20: Nanotubes as Nanoprobes in Scanned Probe Microscopy

Reference: H. Dai, J. Hafner, A. Rinzler, D. Colbert, R. Smalley, *Nature* Vol. 384, 147-150 (1996).

Nanotubes as Field-Emitting Sources

A21: A Carbon Nanotube Field-Emission Electron Source

Reference: W. de Heer, A Chatelain, D. Ugarte, Science Vol. 270, 1179-1180 (1995).

Nanotubes as Molecular Wires

A22: Carbon Nanotubes as Molecular Quantum Wires

Reference: C. Dekker, Physics Today, Vol. 52, No.5 , 22-28 (1999).

A23: Electrical Conductivity of Individual Carbon Nanotubes

Reference: T. Ebbesen, H. Lezec, H. Hiura, J. Bennett, H. Ghaemi, T. Thio, Nature, Vol. 382, 54-56 (1996).

A24: Individual Single-Wall Carbon Nanotubes as Quantum Wires

Reference: S. Tans, M. Devoret, H. Dai, A. Thess, R. Smalley, L. Geerligs, C. Dekker, Nature Vol. 386, 474-477, (1997).

A25: Electronic Structure of Atomically Resolved Carbon Nanotubes

Reference: J. Wildoer, L. Venema, A. Rinzlr, R. Smalley, C. Dekker, Nature Vol. 391, 59-62 (1998).

B. NANOSCALE AND MOLECULAR ELECTRONICS

1. Nanotube Devices

B1: Nanotubes for Electronics

Reference: P. Collins, P. Avouris, Scientific American Vol. 283, No. 6, 62-69 (2000).

B2: Single- and Multi-Wall Carbon Nanotube Field-Effect Transistors

Reference: R. Martel, T. Schmidt, H. Shea, T. Hertel, P. Avouris, Appl. Phys. Lett. Vol. 73, 2447-2449 (1998).

2. Molecular Electronics

B3: Computing with Molecules

Reference: M. Reed, J. Tour, Scientific American Vol. 282, No. 6, 86-93 (2000).

B4: The Electrical Measurement of Molecular Junctions

Reference: M. Reed, C. Zhou, M. Deshpande, C. Muller, T. Burgin, L. Jones, J. Tour, in in Molecular Electronics: Science and Technology , pp. 133-144 (1998).

B5: Conductance of a molecular junction

Reference: M. Reed, C. Zhou, C. Muller, T. Burgin, J. Tour, "Conductance of a Molecular Junction", Science Vol. 278, 252-254 (1997).

B6: Large On-Off Ratios and Negative Differential Resistance in a Molecular Electronic Device

Reference: J. Chen, M. Reed, A. Rawlett, J. Tour, Science Vol. 286, 1550-1552 (1999).

3. Single-Electron and Nanoscale Inorganic Devices

B7: Overview of Nanoelectronic Devices

Reference: D. Goldhaber-Gordon, M. Montemerlo, J. Love, G. Opiteck, J. Ellenbogen
from: http://www.mitre.org/technology/nanotech/list_of_articles.html

B8: Quantum Electron Devices

Reference: F. Capasso, S. Datta, Physics Today, Vol. 43, No. 2, 74-82 (1990).

B9: Artificial Atoms

Reference: M. Kastner, Physics Today, Vol. 46, No. 1, 24-31 (1993).

B10: Potential and Challenges of Single Electron Devices

Reference: S. Altmeyer, K. Hofmann, A. Hamidi, S. Hu, B. Spangenberg, H. Kurz, Vacuum, Vol. 52, 295-299 (1998).

B11: Observation of Quantum Effects and Coulomb Blockade in Silicon Quantum Dot Transistors at Temperatures Over 100 K

Reference: E. Leobandung, L. Guo, Y. Wang, S. Chou, Appl. Phys. Lett., Vol. 67, 938-940 (1995)

B12: Room Temperature Operation of a Single Electron Transistor Made by the Scanning Tunneling Microscope Nanooxidation Process for the TiO_x/Ti System

Reference: K. Matsumoto, M. Ishii, K. Segawa, Y. Oka, B. Vartanian, S. Harris, Appl. Phys. Lett., Vol. 68, 34-36 (1996).

B13: A Single-Electron Transistor Made from a Cadmium Selenide Nanocrystal

Reference: D. Klein, R. Roth, A. Lim, A. Alivisatos, and P. McEuen, Nature Vol. 389 699-701 (1997).

B14: Single-Electron Memory for Giga-to-Tera Bit Storage

Reference: K. Yano, et al. Proc. IEEE Vol. 87, 633-649 (1999).

B15: A Silicon Single-Electron Transistor Memory Operating at Room Temperature

Reference: L. Guo, E. Leobandung, S. Chou, Science Vol. 275, 649-651 (1997).

4. DNA Computation

B16: Computing with DNA

Reference: L. Adelman, Scientific American Vol. 279 (August 1998). p 54-61.

C. NANOTECHNOLOGY IN MAGNETIC STORAGE

C1: The Future of Magnetic Data Storage

Reference: Thompson, D.A., Best, J.S. *The Future of Magnetic Data Storage*: IBM J. Res. Dev. Vol. 44 No. 3, May 2000.

C2: Desiderata of Storage Devices

Reference: Yeack, C.E., Hernando, A. (ed.) in Nanomagnetism, Kluwer Academic Publishers, pgs 1-7, Netherlands, 1993

C3: Ab Initio Micromagnetic Calculations for Particles

Reference: Fredkin, D.R., Koehler, T.R., J. Appl. Phys. 67 (9), 5544-5548 (1990).

C4: Large Area High Density Quantized Magnetic Disks Fabricated Using Nanoimprint Lithography

Reference: Chou, S.Y. et al., J. Vac.Sci. Technol.B 16 (6), 3825-3829 (1998).

C5: Synthesis of Monodisperse Cobalt Nanocrystals and their Assembly into Magnetic Superlattices

Reference: Murray, C.B., Sun, S., J.Appl. Phys. 85 (8), 4325-4330 (1999).

D. NANOTECHNOLOGY IN INTEGRATIVE SYSTEMS

Microelectromechanical devices and integrative systems

D1: The Broad Sweep of Integrated Microsystems

Reference: McWhorter, P.J., Picraux, S.T., IEEE Spectrum, p 24-33, December 1998.

D2: Surface Micromachining for Microelectromechanical Systems

Reference: Bustillo, J.M., Howe, R.T., Muller, R.S., Proc. IEEE: vol. 86 (8), 1552-1574, August 1998.

Oscillatory Response of Mechanical Systems

D3: Damped and Forced Oscillatory Motion

Reference: H. Young and R. Freedman, University Physics, 10th edition (Addison Wesley, San Francisco, 2000), pp 411-418.

D4: Quality Factors in Micron- and Submicron- Thick Cantilevers

Reference: Yasumura et al., IEEE J. MEMS vol. 9 no. 1, 117-125 (2000).

Nanoelectromechanical Systems for the Detection of Small Forces

D5: Force Detection of Nuclear Magnetic Resonance

Reference: Rugar, D. et al., Science vol. 264, 1560-1563 (1994).

D6: A Nanometer-Scale Mechanical Electrometer

Reference: Cleland, A. N., Roukes, M.L., Nature vol 392, 160-162, March 1998.

Nanoelectromechanical Systems for Integrative RF Devices

D7: Micromachined Devices for Wireless Communications

Reference: Nguyen, T.C., Katehi, P.B., Rebeiz, G.M., Proc. IEEE vol. 86 (8), 1756-1767, August 1998.

D8: Fabrication of High Frequency Nanometer Scale Mechanical Resonators from Bulk Si Crystals

Reference: Cleland, A. N., Roukes, M.L., Appl Phys Lett. 69 (18), 2653-2655 (1996).

E. NANOTECHNOLOGY IN OPTOELECTRONICS

E1 : Basics of Optoelectronic pn-Junction Devices

Reference: Fukuda, Optoelectronic Devices, pgs 1-7.

E2 : LED and Semiconductor Lasers

Reference: Sze, S.M., “Physics of Semiconductor Devices”: pp 681-689 & 704-711.

E3: Fabrication of Mesoscopic Semiconductor Structures

Reference: Ahopelto, J., “Acta Polytechnica Scandinavica”: pp 4-31, Helsinki, 1995.

E4: Red-Emitting Semiconductor Quantum Dot Lasers

Reference: S. Fafard, K. Hinzer, S. Raymond, M. Dion, J. McCaffrey, Y. Feng, and S. Charbonneau, Science Vol. 274, pp 1350-1353 (1996)

E5: Semiconductor Nanocrystals as Fluorescent Biological Labels

Reference: Alivisatos, A.P., et al. Science vol. 285, 2013-2016 (1998).

F. NANOBIO TECHNOLOGY

F1: Chip Technology for Microseperation

References: Smello, A.J., Manz, A., Kohler, J.M. (ed.), in Microsystem Technology: A Powerful Tool for Biomolecular Studies, pp 129-171, Berkhauser Verlag, Switzerland, 1999.

F2: Biomimetic Thin Films

Reference: Cooper, T.M., Nalwa, H.S. (ed.), “Handbook of Nanostructured Materials and Nanotechnology”: pgs 711-719, 760-769, vol. 2, Academic Press, San Diego CA., 2000.

F3: Sensors for Biomolecular Studies

References: Rickert, J., Wessa, T., Gopel, W., Kohler, J.M. (ed.), “Microsystem Technology: A Powerful Tool for Biomolecular Studies”: pgs 279-305, Berkhauser Verlag, Switzerland, 1999.

F4: Self-Assembly, Manipulation, and Discrimination of DNA Molecules by STM on Solid Surfaces

Reference: Kawai, T., in Annals New York Academy of Sciences, pp 230-242.

F5: The Way Things Move: Looking Under the Hood of Molecular Motor Proteins

Reference: Vale, R.D., Milligan, R.A., Science vol. 288, 88-95, April 2000.
